EXPERIENCE

AIRSCALE PRIVATE LIMITED | SOFTWARE DEVELOPER

(2+ YEARS)

Sept 2022 – Jun 2025 | Coimbatore, Tamil Nadu

- Played a core backend role in building and scaling **Subscrib.ai**, a live production SaaS platform for intelligent subscription management and analytics.
- Developed scalable Go microservices with **CI/CD and Docker**, improving modularity and deployment speed.
- Created a **RAG-based chatbot** using Groq and open-source embeddings to deliver highly accurate contextual answers, increasing user satisfaction.
- Engineered a **natural language to SQL pipeline** using LLMs, enabling **100 %** of non-technical users to query business data easily.
- Engineered an **AI assistant with LangChain** to automate internal tasks, reducing the manual support load by **85%**.
- Optimized complex **ClickHouse queries**, achieving **10×** faster performance for analytics workflows.
- Designed and deployed **embeddable chatbots** with FastAPI, React, PostgreSQL and RAG concepts for seamless B2B integration.
- Delivered multiple Python-based **GenAI prototypes and POCs** to streamline customer engagement and drive product innovation.
- Contributed to the launch of **real-time features with subscription-based access**, enhancing the scalability and monetization of the platform.

PROJECTS

SUBSCRIB.AI | SAAS FOR SUBSCRIPTION & INVOICE

MANAGEMENT

Go, PostgreSQL, LLMs, Docker • Sept 2022 – Jan 2025

- Core backend developer for a live production SaaS platform used by businesses for smart billing and analytics.
- Built scalable Go microservices, LLM-based assistants, and real-time features with a subscription-based access model.

LLM-POWERED CHAT ASSISTANTS | INTERNAL AI TOOLS FOR CONTEXTUAL Q&A AND DATA ACCESS

Python, RAG, Hugging Face, Groq, MySQL • May 2024 – Jul 2024

- Built a contextual **RAG-based chatbot** using Groq and Hugging Face to query internal documents, eliminating OpenAI dependency.
- Developed a **natural language to SQL assistant** with LLaMA-3, allowing users to query MySQL business data intuitively via CLI.

FACE RECOGNITION ATTENDANCE SYSTEM | REAL-TIME MULTI-FACE TRACKER

Python, Deep Learning • Sep 2023 – Dec 2023

- Developed a secure attendance system using CNN-based face recognition with real-time dashboard logging.

AI FITNESS GAME | POSE-BASED GESTURE CONTROLLER

Python, OpenCV • Aug 2023 – Sept 2023

- Designed a webcam-based fitness game interface using real-time pose tracking and gamified health logic.

EDUCATION

ERODE SENGUNTHAR

ENGINEERING COLLEGE |

B.TECH IN ARTIFICIAL INTELLIGENCE

AND DATA SCIENCE

Sept 2020 – May 2024 | Erode, TN

Cumulative GPA: 8.44 / 10.0

TECHNICAL SKILLS

Languages: Go, Python, SQL, JavaScript

Frameworks: FastAPI, LangChain, Streamlit, OpenCV

Databases: PostgreSQL, MySQL, ClickHouse, NoSQL

AI/GenAI: LLMs (Groq, LLaMA-3), RAG, Hugging Face, Prompt Engineering

DevOps/Cloud: Docker, Git, GitHub, Linux, AWS (Basics), CI/CD

Other Skills: REST APIs, Microservices, CLI Tools, OAuth, Unit Testing, Agile, Scrum, Version Control, Grafana.

CERTIFICATIONS

- **Google:** Google Data Analytics Professional Certification
- **IBM:** Python for Data Science
- **Postman:** Postman API Fundamentals Student Expert

ACHIEVEMENTS

- **Best Outgoing Student** (2023–24), ESEC.
- Won **5× 1st Prizes** in Paper Presentations (2023).
- **1st Prize**, Project Presentation, Excel Engg. College.
- Runner-Up, National Project Expo, Saintgits College.
- Part of **Guinness Record Event** on Face Recognition.
